COURSE DESCRIPTION

Construction Quality Management Certification Course (Corps Of Engineers Prospect #784) is authorized by USACE (US Army) and NAVFAC (US Navy) and required by many government agencies including Veterans administration, General Services Administration (GSA), US Air Force, Department of Homeland Security (DHS), and national Park Service (NPS).

This Certificate is presented as a result of partnering efforts with the American Associated Builders and Contractors (ABC), Associated General Contractors (AGC), the U.S. Army Corps of Engineers (USACE), and the Naval Facilities Engineering Command (NAVFAC).

This CQM course familiarizes contractors with quality control concepts and best practice procedures and is required for most of the Project Managers to run works on government contracts worldwide.
